

BN650 100% Solid Grade Thermoplastic Acrylic Resin

Introduction

The BN650 is a 100% solid methacrylic resin with excellent weather resistance, discoloration resistance, transparency, gloss, scratch resistance and good solvent resistance.

It is commonly used in combination with other additives for Interleaving powder, gravure ink, printing ink, coating, etc., and is more suitable for top coating.

It shows solubility in various solvents such as ester and ketone.

Typical Application

- Interleaving powder
- Gravure printing inks
- Protective coating for plastics

Physical Properties

Appearance	Powder
Solid content, mass %	100
Molecular weight (Mw, ave.)	130,000
Density @ 25°C, kg/liter	1.18
Glass transition temperature (°C)	110
Acid value (mg KOH/g)	0

REMARKS : The listed values should be used for reference purpose only.
